

Karan Kukadiya

Data Analyst | SQL | Python | Power BI | Excel

✉ karankukadiyaa@gmail.com ☎ 9327170178 📍 Ahmedabad 🌐 LinkedIn 🐙 GitHub 📁 Portfolio

SUMMARY

Recent Computer Engineering graduate with hands-on experience in data analytics, KPI reporting, dashboard development, and business reporting through internship and academic projects. Proficient in SQL, Python, Power BI, and Advanced Excel for analyzing data, identifying trends, and supporting data-driven decision-making. Strong analytical and problem-solving skills with experience in process improvement and reporting automation.

PROFESSIONAL EXPERIENCE

Python Data Analytics Trainee, QSpiders

01/2026 – 04/2026 | Ahmedabad, Gujarat

- Developed interactive Power BI dashboards, KPI reports, and business visualizations using Power BI and Advanced Excel to monitor business performance, analyze key metrics, and support data-driven decision-making.
- Collected, cleaned, transformed, validated, and analyzed structured business data using SQL, Python, and Excel to improve reporting accuracy, identify trends, and deliver actionable business insights.
- Built analytical reports and dashboards to track KPIs, troubleshoot data issues, support business operations, communicate findings to stakeholders, and contribute to process improvement and reporting automation.

EDUCATION

Bachelor of Engineering in Computer Engineering

2022 – 2026 | Ahmedabad, Gujarat

Ahmedabad Institute of Technology, GTU

CGPA: 8.40/10

SKILLS

Power BI: Power BI Desktop, DAX, Power Query, Data Modeling, Dashboard Development, KPI Reporting, Business Dashboards, Data Visualization

SQL: PostgreSQL, MySQL, Google BigQuery, Joins, Aggregate Functions, Window Functions, CTEs, Subqueries, Query Optimization, Basic Stored Procedures, Basic PL/SQL

Python: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Selenium, BeautifulSoup, Data Cleaning, Data Validation, Data Wrangling, Exploratory Data Analysis (EDA), Data Analysis, Reporting Automation

ML: Regression, Classification, Random Forest, XGBoost, Logistic Regression, Feature Engineering

Excel: Advanced Excel, Pivot Tables, XLOOKUP/VLOOKUP, Power Query, Power Pivot, Dashboard Creation, Conditional Formatting, Data Validation, Data Visualization

Statistics & Analytics: Descriptive Statistics, Hypothesis Testing, Correlation Analysis, Trend Analysis, Business Intelligence, Business Analytics

Tools: Git, GitHub, Jupyter Notebook, VS Code, Streamlit, Oracle SQL Developer, Microsoft Office, Google Workspace

Core Skills: Data Analysis, Supply Chain Analytics (Basic), Business Analytics, Data Cleaning, Data Validation, Data Transformation, Data Visualization, Dashboard Development, KPI Reporting, Business Reporting, Business Intelligence, Business Insights, Trend Analysis, Decision Support, Process Improvement, Reporting Automation, Basic Data Governance

CERTIFICATES

Cisco Networking Academy – Data Analytics Essentials [🔗](#)

HackerRank – SQL (Intermediate) [🔗](#)

HackerRank – Python (Basic) [🔗](#)

IBM - Data Analytics Using Python [🔗](#)

PROJECTS

Credit Card Financial Dashboard | Power BI, DAX [🔗](#)

- Built an interactive Power BI dashboard using DAX to analyze 10K+ customer records, enabling KPI tracking and business performance monitoring.
- Identified high-value customer segments and actionable insights by analyzing transaction type, income, education, marital status, and card type to support data-driven decisions.

Customer Churn Prediction | Python, ML, Power BI, Streamlit [🔗](#)

- Built an end-to-end analytics solution on 12K+ customer records using SQL, Python, Power BI, and Machine Learning, achieving ~82% prediction accuracy.
- Developed an interactive dashboard and real-time prediction app, identifying key churn drivers to support proactive customer retention strategies.

SmartSpec Analytics | Pandas, NumPy, Selenium, PostgreSQL, Power BI, Streamlit, Scikit-learn, Matplotlib [🔗](#)

- Collected, cleaned, and analyzed 5,627 smartphone records using web scraping, SQL, and Python to uncover pricing trends and business insights.
- Developed Random Forest and XGBoost models with 97.09% R^2 for price prediction and delivered interactive analytics for market analysis.
