

Karan Kukadiya

Data Analyst | Power BI | SQL | Python

✉ karankukadiya@gmail.com ☎ 9327170178 📍 Ahmedabad 🌐 LinkedIn 🏠 GitHub 📁 Portfolio

SUMMARY

Recent BE Computer Engineering graduate with hands-on experience in SQL, Python, and Power BI through academic projects analyzing real-world datasets. Skilled in Data Cleaning, ETL processes, and Statistical Analysis, with a strong ability to build dashboards that translate complex data into clear business insights.

PROFESSIONAL EXPERIENCE

Python Data Analytics Trainee, QSpiders

01/2026 – 04/2026

Ahmedabad, Gujarat

- Developed, maintained, and enhanced Power BI dashboards based on stakeholder requirements, providing KPI tracking, business performance monitoring, and actionable insights.
- Collaborated with team members and trainers to understand reporting requirements, communicated KPI insights through reports and presentations, and supported data-driven decision-making.
- Performed data cleaning, validation, and transformation to ensure accuracy and consistency before analysis.

EDUCATION

Bachelor of Engineering in Computer Engineering,
Ahmedabad Institute of Technology, GTU

2022 – 2026 | Ahmedabad, Gujarat

SKILLS

Excel Skills: Pivot Tables, XLOOKUP/VLOOKUP, Power Query, Dashboard Creation, Data Visualization.

SQL Skills: Joins, Aggregate Functions & GROUP BY, Window Functions, CTEs & Subqueries, Data Filtering & Transformation, BigQuery.

Python Skills: Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn, Data Wrangling & ETL, Exploratory Data Analysis (EDA), Predictive Modeling, Web Scraping (Selenium, Requests, BeautifulSoup).

BI Tools: Power BI, Tableau, Dashboard Development, Data Modeling, DAX, Calculated Fields, Business Intelligence, KPI Tracking & Reporting.

Statistics: Descriptive Statistics, Probability Distributions, Hypothesis Testing, Correlation & Regression Analysis, Data Sampling, Statistical Analysis.

Core Competencies: Data Cleaning & Validation, Data Analysis, Trend Analysis, Business Intelligence, ETL, Dashboard monitoring, Data-Driven Decision Making.

Tools: Google BigQuery, Oracle SQL Developer, Jupyter Notebook, VS Code, PyCharm, Git, GitHub, Streamlit, Microsoft Office, Google Workspace.

PROJECTS

Credit Card Financial Dashboard | Power BI, DAX 📁

- Developed KPI dashboards and trend analysis reports to support business performance monitoring and customer segmentation.
- Built Power BI dashboard using DAX across 10K+ customers – segmenting by transaction type, education, marital status, income and card type.
- Uncovered that low-income customers, graduates, and married segments drive disproportionate revenue; flagged Blue card's high CAC and low online adoption

Customer Churn Prediction | Python, ML, Power BI, Streamlit 📁

- Built predictive models to forecast customer churn and provide actionable retention recommendations.
- Built 4 ML models (Random Forest, XGBoost, LR, DT) on 12K+ records; deployed real-time churn scoring via Streamlit app and Power BI dashboard.
- Achieved ~82% accuracy; flagged satisfaction score, network complaints, and port requests as top churn drivers — enabling targeted retention action.

Customer Behavior Analysis | Python, SQL, Power BI, DAX 📁

- Analyzed customer purchasing patterns, business KPIs, and revenue trends to identify opportunities for business improvement and decision support.
- Built end-to-end solution on 5K records — 12 SQL queries, 5 KPIs, 13 Power BI visuals across sales and customer segments.
- Flagged 264K revenue-risk products via low ratings; 51+ age group drives 40% revenue (399K) — recommended targeted marketing and product fixes.
